--ABSTRACT

The present invention relates to grinding apparatus for  
 grinding the hard metal inserts of rock drill bits, said  
 grinding apparatus having a grinding machine carried on an  
 10 support system that provides a feed pressure for said grinding  
 machine during grinding, said grinding machine equipped with a  
 grinding pin driven by motor to rotate about its longitudinal  
 axis wherein the grinding cup is rotated at variable speeds  
 and the support system provides a variable feed pressure.--
